Obtaining permission to reproduce a KamLAND-Zen figure

Hi,

I'm a graduate student at Stanford working on EXO-200. I'm currently finishing up my dissertation, and I'd like to include Figure 2 from <http://arxiv.org/abs/1205.6372> in discussing Majoron-emitting decays. I'm trying to figure out who I might be able to contact in order to obtain formal permission to reproduce the figure. It just makes the school happier if I have something like that.

I asked around and people suggested that you might at least be able to point me in the right direction. Would you be able to provide any help?

Thank you,

—

Steve Herrin

Dear Steve,

This article is published in PRC:

<http://dx.doi.org/10.1103/PhysRevC.86.021601>

PRC articles are licensed under the Creative Commons license:

<http://creativecommons.org/licenses/by/3.0/>

My understanding is that this implies that you may reproduce figures and quote text from the paper to your heart's content as long as you cite the work. No formal permission is needed from the authors.

For reproducing figures, it is conventional to put the citation right within the figure caption. I suggest adding at the end of the caption, "Reproduced from [ref]."

Good luck finishing up!

Thanks,

Jason
